Owner hereby dedicates perpetually the tracts including subsurface, surface and airspace under, on and over such tracts, shown on the plat as street(s), road(s), avenue(s), drive(s), boulevard(s), highway(s), crosswalk(s) and alley(s) (collectively "right of way), respectively, to the public, for public use, with the right to use, construct, maintain, repair, operate and occupy said right-of-way for vehicular, pedestrian and other transportation purposes and right-of-way purposes, and utility purposes, including but not limited to water, sanitary sewer, storm sewer and drainage, electricity, gas, telephone, cable television or any other use the public entity in whose jurisdiction the right-of-way lies shall deem to be necessary or useful to the public. The public entity with jurisdiction on behalf of the public shall have the right to maintain said right-of-way free from buildings, fences, structures or any obstructions of any kind whatsoever. No person shall obstruct said right-of-way unless the public entity with authority to do so and all public utilities with facilities located in the easement otherwise authorize said obstructions in writing. Vegetation, unless otherwise prohibited by law, shall not be considered an obstruction of right-of-way nor shall post office boxes or other small structures required by law to be placed in the right-of-way. The cost of removing unauthorized obstructions shall be borne by the property owner of the property on which the obstruction is located, provided that the cost of removing obstructions placed in the public right-of-way shall be borne by the person or persons creating the obstruction pursuant to the laws and ordinances of the jurisdiction with control of the right-of-way. The streets, avenues, drives, roads, highways and boulevards shall bear the respective name(s) as shown the plat subject to the right of the public entity with appropriate authority to change said name as provided by law.

Dedication of Utility Easements to the Public

Owner hereby dedicates perpetually the tracts shown on the plat as "utility easements" to the public for use by utilities for public utility purposes including but not limited to water, sanitary sewer, storm sewer and drainage, gas, telephone, electricity, cable television or any other such use that the public entity in whose jurisdiction the easement lies shall deem to be a utility. Such public entity shall have the right to authorize persons to construct, occupy, maintain, use, repair and reconstruct utilities within said easement and to maintain or authorize the utility to maintain said easement free from buildings, fences, structures and obstructions of any kind whatsoever. No person shall obstruct said easement unless the public entity with authority to do so authorizes said obstruction in writing. Vegetation, unless otherwise prohibited by law, shall not be considered an obstruction of the easement nor shall post office boxes or other

small structures required by law to be placed within the easement; however, the property owner shall bear the cost of repair or replacement of any such items damaged or destroyed as the result of use or maintenance of the easement for utility purposes. The cost of removing unauthorized obstructions shall be borne by the property owner of the property on which the obstruction is located.

#### Dedication of Drainage easements to the Public

Owner hereby dedicates perpetually the tracts shown as drainage easements or drainage ways or facilities to the public for storm water drainage purposes including but not limited to constructing, using, operating, maintaining, repairing or reconstructing storm water drainage detention, retention, inlet or outlet facilities or any combination thereof and including the right to place spoil from drainage facilities on the same and to maintain said easement free from any building, fences, structures, impermeable surface, or obstruction whatsoever. No person shall obstruct said tract unless the entity with authority to do so authorizes said obstruction in writing. Only grass may be maintained in that portion of any drainage tract located in a floodway or floodplain. Vegetation may be planted, unless otherwise prohibited by law, in the area of the portion of the tract not located in the floodplain, but the owner shall bear the cost of its removal, if the entity with jurisdiction over the tract hereby dedicated, in its sole discretion, deems such removal necessary. Berm or grading changes made which are not in conformance with the approved plans for drainage filed with the City shall be considered obstructions. The cost of removing unauthorized obstructions or berm or grading changes shall be borne by the property owner of the property on which the obstruction is located.
